

A NEW SET OF “WHEELS” FOR NORMA

Let's help Norma Wheelock get a handicap-accessible van!

Norma Jean Wheelock has been confined to a wheelchair for the last 28 years due to a rare form of Muscular Dystrophy. For all of these years, her husband Jim has always been able to transfer her into the car to go out with her portable wheelchair. In recent times, however, that has become more difficult. Her Permobil wheelchair is now her primary wheelchair and it does not disassemble for travel - a van is the only way to transport it.

Although it's always been a challenge for her to go out – the last 2 years have been especially difficult and she has become increasingly more housebound. Handicap Vans are quite expensive and with all of the other expenses of dealing with a chronic illness – it's just not in the budget.

The goal of the newly established, “Norma Jean Foundation” is to raise money for a used handicap van and continue giving Norma the quality of life she deserves. Even if she just goes out locally– for her that would be a miracle.

Norma is truly amazing and she has a spirit like no one else. It's our hope that by getting this van and getting her out – more people will have the opportunity to meet this amazing woman and be blessed by her.

Please don't feel obligated to donate, as we know that everyone has their own challenges. If you would like to help or perhaps you know other people who would be sensitive to this particular need, please pass this along (the foundation information is listed below).

Between the power of prayer and the power of the internet...we can do this! Feel free to post this flyer in your church or work place etc. Thank you in advance for spreading the word.

God Bless you,
Jennifer Wheelock (daughter) / email: normajeansfoundation@hotmail.com
